Dear Josh:

Dad, I knew memory could play tricks but hadn't realized their magnitude or their increase with age. I'm glad your recollections are more reliable than mine.

As for Ed's leaving Stanford I confess I no longer recall much of anything about it. I suspect his decision to move was made after mine to go to Caltech but I just can't remember any details of just when and how.

I'm glad you have been more systematic in documenting events and keeping the records.

All of this convinces me of the importance of getting the facts as nearly as we can and getting them recorded.

You take the lead and I'll do my best to help.

Regards.

Beets
